## NOTICE INVITING TENDER No. 01/2021-22

**Selection of developer for setting up a Greenfield Port near Village Nargol, Valsad District, Gujarat, India. Just 120 km from Surat & 140 km from Mumbai.**

This notice is issued to elicit a 'Request for Proposal' (RFP) from firms possessing financial, technical and managerial capabilities in the development and operations of port and/or other infrastructure to act as a developer of this project. The Developer shall have exclusive freedom in development of the project based on the BOOT Policy.

### BASIC DETAILS ABOUT THE PROJECT

Location of the project site	Latitude 20°14'34.52"N and Longitude 72°44'36.84"E Near Village Nargol, Valsad District, South Gujarat
Evaluation process	A single-stage three-step process which includes Qualification Evaluation, Technical Evaluation and Commercial Evaluation
Estimated project cost in phase1	~INR 3800 Crore
Type of port	All Weather Direct Berthing Port to be developed as an Off-shore Port facility
Concession period	50 years
Tender processing fee	The tender processing fee is INR 2,00,000/- or US \$ 2700/- (plus GST as applicable). Interested parties can download the document from GMB's website – <a href="http://www.gmbports.org">www.gmbports.org</a> as well as <a href="https://gmb.nprocure.com">https://gmb.nprocure.com</a> The tender processing fee shall be paid in the form of Demand Draft or Banker's Cheque along with the Request for Proposal (RFP).

### SCHEDULE OF EVENTS

RFP document downloading start date	25/06/21 @11:00 hrs IST
Last date for seeking queries/clarifications	15/07/21
Pre-proposal conference	22/07/21 @12:00 hrs IST
Authority to respond to queries	29/07/21
Bid due date	26/08/21 @17:00 hrs IST
Date of opening introductory envelope & qualification documents	02/09/21 @12:00 hrs IST
Bid validity period - 270 days from bid due date	

**Pre-bid queries and clarifications  
(to be addressed through letter & email)

## Mansukh Mandaviya urges States to see Indian Port Bill as a development issue

NEW DELHI: Union Minister of State (I/C) for Port, Shipping and Waterways Shri Mansukh Mandaviya chaired the 18th meeting of the Maritime State Development Council (MSDC) through a video conference organized by the Ministry of Ports, Shipping and Waterways.

Addressing the council, Shri Mansukh Mandaviya said that the objective of the Maritime State Development Council (MSDC) is to develop a national plan for the development of the maritime sector beneficial for both states and the centre and to adopt best practices for the sector.

He further said that the development of the country depends on the development of the states and MSDC is the best example of cooperative federalism. "In a scattered way we can't develop, united we can achieve", the Minister added.

Stressing on the need for the 'Indian Port Bill 2021', the Minister requested state governments to see the Indian Port Bill as a development issue and not as a political issue. He highlighted that the 'Indian Port Bill 2021' will facilitate to have optimum management and utilization of the coastline by way of participation by both the Union Government and Maritime States/Union Territories. He assured the states that the Ministry of Ports, Shipping and Waterways will welcome all the suggestions of the states to develop a comprehensive port bill.

# MSC added Services & Equipment to ease Supply Chain Crunch : CEO

MSC CEO speaks at World Ports Conference in Antwerp

Cont'd. from Pg. 3

"The supply chain has been under amazing pressure and there are a number of factors contributing to it," Soren said, speaking in Antwerp, Belgium, on 23 June. "Our company, our industry, has really demonstrated that we could keep supply chains moving despite all the issues."

MSC has started 8 new services in the past few months, deployed available vessel capacity and provided hundreds of thousands of additional containers to help respond to the huge demand for cargo transportation in an extremely challenging and congested market. Unpredicted wild swings in demand, labour shortages at ports and across trucking networks, as well as a legacy of underinvestment in older port complexes have all contributed to the malaise in the market since Q3 2020.

That situation was compounded by the week-long Suez Canal closure in late March and suspension of activities at port terminals in Yantian, South China in May and June, leaving delegates at the World Ports Conference wondering throughout the week-long digital event how port providers could improve resilience and collaboration during times of market disruption.

Soren said MSC was very focused on minimising supply chain disruption, even if shipping and logistics companies are not the cause of the dislocation in the container market.

"We are continuing to expand our footprint to really meet the demands of our customers," he said. "I realise from a service reliability point of view we must do better. It is also in our interests, because today we are consuming way too much fuel, we have too many ships in the networks, too many containers, all as a result of supply chains being stretched."

## Decarbonisation: actions vs aspirational targets

Despite the comprehensive use of fuel and assets, and a waiting game outside congested ports that has seen MSC suffer around 10,000 days-equivalent of lost sailing time, the company has continued to focus on improving energy efficiency in its fleet of over 600 ships. Better access to port infrastructure for larger, more energy-efficient ships and coordination by ports for standardised shore power plug connections are among the interim measures which would help carriers to keep on improving efficiency, Soren said.

The shipping industry is intensifying its focus on the essential task of decarbonisation. A global approach to policy making and regulation and a worldwide R&D fund, which could amount to \$5 billion, or even \$10 billion, will be crucial to catalyse the process. Meanwhile, collaboration with energy companies, engine manufacturers and other shipping companies is also key to unlocking the handful of alternative fuels that must be developed urgently at scale. "When those fuels are there, MSC will also transition to those fuels as quickly as fast as we can," Soren said. "Our focus is on decarbonising the world, less on identifying a target."

## Digitalisation: customer needs

Referring to another key trends of the coming years, Soren – whose keynote followed an earlier interview with MSC Chief Digital & Information Officer Andre Simha on the worldwide deployment of the eBill of Lading – also referred to the key topic of digitalisation as a major "mission" that will shape the future of the container shipping industry.

Digitising processes to improve operational efficiency and enhancing digital channels to propose new solutions to customers will help to ensure that MSC will continue to be "in continuous evolution" for the years to come, Soren said.

# Hapag-Lloyd and Ocean Network Express complete Tradelens Integration

COPENHAGEN and ARMONK: Hapag-Lloyd and Singapore-based Ocean Network Express

(ONE) Pte. Ltd. today announced they have completed integration onto the TradeLens platform, helping ensure a more timely and consistent view of logistics data for their containerized freight around the world. TradeLens is a neutral, third-party platform launched by IBM (NYSE:IBM) and A.P. Moller - Maersk (MAERSKb.CO) to help modernize the world's supply chain ecosystems and is run on IBM Cloud and IBM Blockchain.

Since the completion of multiple pilot projects as well as the integration, Hapag-Lloyd and ONE, the world's fifth and sixth largest carriers respectively, are now working to help their clients and business partners across all major geographies benefit from TradeLens' ability to increase efficiency and improve access to information. They join foundation carriers A.P. Moller - Maersk, as well as CMA CGM and MSC Mediterranean Shipping Company (MSC) who both completed their pilots and integration in October 2020, and five other carriers already inputting shipping data into the TradeLens platform.

Additionally, TradeLens continues to rapidly on-board new organizations from across the shipping industry, recently adding shippers and importers including Van den Ban Tires which use the platform to address back office inefficiencies and improve the visibility of cargo. Recently, KLog.co also became the first freight forwarder in Latin America to join TradeLens to improve efficiency, decrease operational costs and advance KLog.co's goal of opening up international trade to all companies in the region, no matter the size of the business.

"TradeLens technology holds great potential to help enable the digitization of supply chain processes and documentation handling," said Rolf Habben Jansen

"Our customers will clearly benefit from increased transparency, accuracy, speed and efficiency in their supply chains - leading to reduced cost," said Rolf Habben Jansen, CEO of Hapag-Lloyd.

The TradeLens ecosystem now includes more than 300 organizations – encompassing ten ocean carriers and data from more than 600 ports and terminals. TradeLens has already processed 42 million container shipments, nearly 2.2 billion events

and some 20 million documents. In total, five of the top six global shipping carriers are now integrated onto the platform contributing to the digitization of documentation and automated workflows.

"We believe TradeLens can bring together all parties in the supply chain to the digital ecosystem where customers can get seamless, transparent and secure sharing of shipping milestones and trade documents. With its open standards and open governance, it can benefit our customers and the entire industry to drive for digitalization and automation," said Jeremy Nixon, CEO of Ocean Network Express.

TradeLens offers shippers and freight forwarders direct, permissioned access to digitized, multi-carrier visibility and documentation processes through a single platform, reducing the need for paper-based processes and giving participants in global trade a single, up-to-date picture of the flow of their goods.

Through the TradeLens platform, network participants can easily connect their key supply chain partners to the digital platform as well, allowing data and documents to be published and consumed more quickly and only among permissioned parties.

"A huge barrier to global trade has long been the inability for customers to securely share crucial information regarding the status of goods in an easily accessible and transparent way," said Mike White, CEO GTD Solutions and Head of TradeLens. "By addressing this problem, the TradeLens ecosystem has grown rapidly, and the onboarding of Hapag-Lloyd and ONE along with their customers helps extend the value of TradeLens across the entire TradeLens ecosystem, enabling connectivity to two-thirds of global containerized freight for all customers and other permissioned parties through a single platform. All participants benefit from reduced manual processes, while also streamlining processes from automation and improved forecasting."

# Port of Antwerp major entry point to a strong European Internal Market

Port CEO Jacques Vandermeiren meets up with European Internal Market and Industry Commissioner Thierry Breton at the Port of Antwerp

ANTWERP: Port of Antwerp CEO Jacques Vandermeiren met up with European Internal Market and Industry Commissioner Thierry Breton at the Port of Antwerp to discuss the Port's role as a strategic transport, energy, and industrial hub in Europe.

After a guided tour around the Port, Commissioner Thierry Breton and Port CEO Jacques Vandermeiren sat down together to discuss a wide array of important topics ranging from sustainability and digitisation to themes like the value of logistics chains, the impact of Brexit on shippers of goods to and from the United Kingdom, and the merger of the Port of Antwerp with - port of Zeebrugge that is expected to settle at the end of this year.

European ports have proven to be resilient and essential to a strong and internationally well-connected European Internal Market, especially the past one-and-a-half year. Port of Antwerp has the ambition to play a pioneering role in the transition to a climate neutral society and economy by 2050, as set out by the European Green Deal.

**Annick De Ridder, Port alderman:** "Our port serves as a major and essential entry point to the European internal market as it offers the vital link to both businesses and EU-consumers/citizens. Thanks to the agility, dedication, knowhow and resilience of our thousands of employees, we were able to achieve a continuous 100% operational status during the COVID-19 crisis. As a home port we remain ever determined in our mission to facilitate and increase leverage towards a true sustainable future."

**Jacques Vandermeiren, CEO of Port of Antwerp:** "As the largest European integrated petrochemical cluster, we are responsible for a considerable part of CO2 emissions and thus play a crucial role in the climate issue. We must therefore ensure that we become the driver and pioneer of the energy transition. We need to look ahead and prepare ourselves by means of innovation. Digitisation, data and data sharing are critical success factors to this end. It will make supply chains more efficient, sustainable, safer, and more reliable. This is why we are building a robust digital network in the port."

**Thierry Breton, European Commissioner of the Internal Market and Industry:** "The Port of Antwerp illustrates what makes Europe industrially attractive: talented people, state-of-the-art infrastructure, and inventiveness. In our recovery efforts, we are mobilising all EU policy tools to support Europe's industrial hubs green and digital transition and increase our technological leadership, employment potential and economic resilience."

The talks were followed by a press moment at Qpinch. Qpinch is a technological scale-up based in the Port of Antwerp, that is fully committed to energy efficiency in the industrial sector. It has developed a technology allowing residual heat

released in numerous industrial processes to be captured and valorized into valuable, reusable process heat. It is therefore able to achieve major CO2 reductions. Port of Antwerp supports Qpinch with one million euro.

At Qpinch, Commissioner Breton appreciated the first-hand experience of a project contributing to a circular and energy efficient economy. By mobilising several local players, from the University of Ghent to the Port of Antwerp, it shows the benefits of working along industrial ecosystems.

## MOL to Support India towards Coronavirus

TOKYO-Mitsui O.S.K. Lines, Ltd. (President & CEO: Takeshi Hashimoto) has announced the completion of procurement and transport of 844 oxygen concentrators and other medical supplies to India, which has been severely affected by the ongoing COVID-19 pandemic. MOL launched the relief project in May to support the local medical system and the people in India.

The MOL Group together with over 1,500 local employees in India, not only offers ocean transport of energy, bulk cargo, and completed vehicles, but also provides India's domestic logistics and IT-related businesses, etc.

In addition, around 15% of the seafarers serving aboard on the world's merchant fleet are from India, and the MOL Group's Indian seafarers continue to support the global supply chain even in the face of the COVID-19 pandemic.

The MOL Group would like to thank everyone who has managed to keep the global supply chain running in this difficult

time, and sincerely hopes everyone to stay safe and the COVID-19 crisis to be resolved as soon as possible.

**OFFICE OF THE PR. COMMISSIONER OF CUSTOMS (NS-V),  
JAWAHARLAL NEHRU CUSTOM HOUSE**

NHAVA SHEVA, TAL - URAN, DISTRICT - RAIGAD, MAHARASHTRA - 400 707.

F. No.S/16-39/2021-22/LAB/JNCH  
DIN - 20210678NX000000CC1C

Dated : 23.06.2021

**PUBLIC NOTICE NO. 57/2021****Sub. : CRCL Module- Forwarding of samples using electronic  
Test Memo to CRCL and other Revenue Laboratories - reg.**

Attention of all Importers/Exporters, Custom Brokers and other stakeholders is invited to Instruction No. 14/2021 dated 21.06.2021 issued by CBIC, New Delhi (copy enclosed) on the above subject.

2. Reference is also invited to CBIC Circular No. 46/2020-Customs dated 15.10.2020 (copy enclosed) regarding the testing of samples by Central Revenues Control Laboratory (CRCL) and other Revenue Laboratories.
3. CRCL and other Revenue Laboratories have been upgraded with several new, state of the art equipment, thereby enabling the testing of a wider variety of commodities in lesser time, with greater accuracy. For details, the CRCL brochure available at [www.crcl.gov.in](http://www.crcl.gov.in) may be perused. Eight of these Laboratories, namely, CRCL, New Delhi; CH Laboratory, Kandla; Customs Sr. CX Laboratory, Vadodara; NCH Laboratory, Mumbai; JNCH Laboratory, Nhava Sheva; CH Laboratory, Kochi; CH Laboratory, Chennai; and the CH Laboratory, Vizag, have been accredited by the NABL, as per ISO/IEC 17025:2017 for defined scope of tests. CRCL, New Delhi and Customs & CX Laboratory, Vadodara have also been, recently, recognised as FSSAI labs and are, now, mapped with the FSSAI portal. In locations where FSSAI officers are not posted and customs officers are drawing samples as per FSSAI requirements, they can also use these two facilities for testing of food samples.
4. In order to further ease the testing process, DG Systems has enabled a 'CRCL module' in ICES with the objective of automating all paperwork related to sampling, forwarding of test memos to CRCL and other Revenue Laboratories, and electronic receipt of test reports, instantly by the Customs Officers. The officials of CRCL and other Revenue Laboratories have been provided access for both import and export functionalities in the CRCL module. The CRCL module is also seamlessly integrated with current modules of ICES. The salient features of the CRCL module are as follows:
  - i. Customs Officers will be able to select the CRCL/other Revenue Laboratory using the 'Lab Code' on the basis of directories incorporated therein and generate a Test Memo for sending a sample to the said laboratory.
  - ii. The option of recording the drawal of samples by the Shed Examiner is also provided.
  - iii. Post physical receipt of sample by the laboratory concerned, it would be accepted under acknowledgment to the Customs officer and verified to assess whether the sample is adequate for testing. If the sample is not considered adequate for testing, a return memo would be sent back to the Customs officer along with reason for non-acceptance. The grounds for return/rejection of a test sample could be on account of improper packing, missing/ tampering with seals. insufficient quantity, non-receipt of requisite technical documents or non-observance of other test parameters etc.
  - iv. If the sample is in order and is considered adequate for testing, it is allocated to any one of the Chemical Examiners in the said laboratory.
  - v. The date of receipt of the sample at the laboratory is provided in the system. There is also a provision of a 'suspend queue' to indicate reasons for delay or suspension of testing, for any reason.
  - vi. Post testing of the sample, the module provides the facility to enter the respective Import/Export Test Report in the system.
  - vii. The Customs Officer at the site would be able to view the Test Report electronically in ICES and take further action.
  - viii. Specific MIS reports would enable the monitoring of the pendency and time taken for sending of the Test Report by the laboratory.
5. As stated above, the use of the CRCL module is aimed at leveraging technology for bringing efficiency, transparency and reduction in the cost of compliance for the trade in regard to the sampling process, which impacts the clearance of import/export goods. The said module would also help in better monitoring of the sampling process for faster processing at all the levels.
6. Accordingly, all the concerned Officers and Staff of JNCH are hereby advised to mandatorily make use of the CRCL module to forward Test Memos for testing of samples to CRCL and other Revenue Laboratories from 01.07.2021 onwards. CRCL and other Revenue Laboratories shall not accept samples unless the Test Memo has been transmitted electronically on the CRCL module. In other words, the laboratories will not accept samples based on paper Test Memos from this date onwards. DG Systems will be separately issuing a detailed advisory on the use of CRCL module.
7. While the use of the CRCL module is being made mandatory with effect from 01.07.2021, in case of any unforeseen systems issue/glitch that prevents the use of the said module, the sample can be accepted based on paper Test Memo, provided this is sent with the due approval of the Additional/ Joint Commissioner of Customs of the concerned field formation. This relaxation is being made so as not to hold up any clearance of import/export goods, in the event of a rare circumstance.
8. Difficulty, if any, faced in implementation of this Public Notice may be brought to the notice of the undersigned at email id [commr-ns5\(agov.in\)](mailto:commr-ns5(agov.in)).
9. This Public Notice should be considered as Standing Order for the concerned Officers and Staff of Customs JNCH.

Sd/-  
(Rajesh Kumar Mishra)  
Commissioner of Customs, NS-V

## OFFICE OF THE PR. COMMISSIONER OF CUSTOMS (NS-III), CONTAINER SCANNING DIVISION, JAWAHARLAL NEHRU CUSTOM HOUSE

NHAVA SHEVA, TAL - URAN, DISTRICT - RAIGAD, MAHARASHTRA - 400 707.

F. No.S/V-30-Misc- 111/2016 CSD JNCH

Dated : 23.06.2021

**PUBLIC NOTICE NO. 58/2021**

**Sub.: Roll out of Mobile X-Ray Container Scanners (MXCS) Installed at APMT and NSICT/DP WORLD Terminals and working hours of MXCS at NSICT/DP WORLD (Scan Mode - M2) & APMT (Scanned Mode - M3) - reg**

Attention of the Importers, exporters, Custodians, Customs Brokers, General Trade, Port Terminal Operators, Shipping Lines / Shipping Agents, Container Freight Stations coming under the jurisdiction of Jawaharlal Nehru Custom House and all other stakeholders is invited to Public Notice No. 31/2021 dated 30.03.2021 whereby the Mobile X-Ray Container Scanner (MXCS) installed at JNPCT Terminal / Site of Jawaharlal Nehru Port was successfully commissioned and rolled out.

- The other two Mobile X-Ray Container Scanners (MXCS) installed at APMT and NSICT/DP WORLD Terminals shall be rolled out for routine operation w. e. f. 25.06.2021.
- All the provisions and procedures as laid down in Public Notice No. 31/2021 dated 30.03.2021 and Standing order No 07/2021 dtd. 30.03.2021 will be relevant and applicable for the MXCS installed at APMT and NSICT/DP WORLD Terminals.
- With regard to working hours of these Mobile Scanners, it is envisaged that:
  - Mobile X-Ray Container Scanner located at NSICT/DP World site shall be operational 24\*7.
  - Mobile X-Ray Container Scanner located at APMT site shall be operational during day time only between 09.00 am to 07.00 pm on all days.
  - After 07.00 PM, all the containers selected for scanning at MXCS(APMT) will invariably be diverted for scanning to DTCS without any endorsement from Customs.
- In case of any difficulties faced in implementing this Public Notice, the specific issue may be brought to the notice of the Deputy Commissioner/ CSD, JNCH via e-mail Id: [csd.jnch@gov.in](mailto:csd.jnch@gov.in)

Sd/-  
(S. K. Vimalanathan)  
Pr. Commissioner of Customs NS-III,  
JNCH, Nhava-Sheva.

**NOTICE TO CONSIGNEES****ZIM INTEGRATED SHIPPING SERVICES**

m.v. “**IAN H**” V-ZIM VOY (IH2 24/E) I.G.M. NO. 2285593 DTD. 21-06-2021

The above vessel has arrived at **NHAVA SHEVA (GTI)** on 26/06/2021 with Import Cargo in containers.

Item Nos.	B/L NOS.	Item Nos.	B/L NOS.
696	ZIMULAX914495	698	ZIMUVAN941341
697	ZIMUMTL909316	699	ZIMUVAN942796

Consignees are requested to obtain the DELIVERY ORDERS on presentation of ORIGINAL BILLS OF LADING and on payment of relative charges as applicable within 5 days or else Detention Charges will be applicable.

If there is any delay in CY-CFS movement due to port congestion Line/Agent are not responsible for the same.

Consignees will please note that the Carriers and/or their Agents are not bound to send individual notifications regarding the arrival of the vessel or the goods. For detailed information on cargo availability please contact our office.

**For any charges enquiries, Please contact on our Import Hotline No. : 4252 4444**

# Mansukh Mandaviya urges States to see Indian Port Bill as a development issue

Cont'd. from Pg. 3

The Minister of MoPSW said, "The 18th Maritime State Development Council Meeting today has discussed very significant issues pertaining to the overall progress of the maritime sector. Both Central Government and State Governments will jointly work on the development of the maritime sector including several non-functional ports. Our growth aspiration, as visioned by our Prime Minister, need collective actions in a time-bound manner and MSDC is an active platform to discuss these matters".

The key items discussed during the meeting are Indian Port bill 2021, National Maritime Heritage Museum (NMHC), Rail and Road connectivity with Ports, Floating Jetties for Marine Operations and Sea Plane Operations, Sagarmala Projects and National Infrastructure Pipeline (NIP) projects.

**Indian Port Bill 2021: A step towards accelerating India's Port Development**

In FY 2020, the traffic handled at Indian ports is about 1.2 billion MT, which is expected to increase to 2.5 billion MT by 2030. On the other hand, only a few ports in India are having deeper draft which can handle capsize vessels. In addition, there are around 100 non-functional ports distributed across the coast of India. The ever-increasing size of ships mandates to have deeper draft ports and indeed mega ports need to be developed. Similarly, the non-functional ports also need to be prioritized and developed.

A national-level integrated approach is required to augment the existing ports or to develop new ports in an efficient and sustainable manner which in turn will reduce the freight costs to a greater extent and improve the trade growth. The national-level integrated port planning is also highlighted in various report including 'The World Bank's Port Reform book, UNCTAD's 'Handbook for Planners in Developing Countries' etc.

MSDC will advise on the planning of all ports including Major Ports. In addition, several conventions pertaining to safety, security and prevention of pollution are incorporated in IP Bill 2021 for implementation of all requirements stipulated in such conventions by all ports.

**NMHC – India's first maritime heritage complex**

National Maritime Heritage Complex (NMHC) is to be developed as a world-class museum dedicated to the legacy of Maritime Heritage of India, in an area of about 350 acres at Lothal, Gujarat. This maritime heritage complex would be developed as an international tourist destination with a maritime museum, lighthouse museum, maritime theme parks, amusement parks, etc.

One of the key attractions of NMHC is that it would have a pavilion for each coastal states and union territories to showcase the maritime heritage of the specific states and union territories. During the meeting, the coastal states and UTs were requested to take up the development of their respective pavilion.

**Enhancing Port Connectivity**

The upgradation of port connectivity is one of the critical enablers for ports, and MoPSW through its key initiative Sagarmala Programme emphasizes port connectivity. MoPSW has taken up 98 port-road connectivity projects worth Rs. 45,051 cr. with various implementation agencies like MoRTH, Major Ports, Maritime Boards, and State Road Development Companies, of which 13 projects are completed and 85 projects are in various stages of development and implementation. Similarly, 91 port-rail connectivity projects worth Rs. 75,213 Cr. have been taken up by MoPSW with Indian Railways, Major Ports, and Maritime Boards, of which 28 projects are completed and 63 projects are in various stages of development and implementation.

To address the issues in funding and for the projects that are not suitable to develop under PPP mode, it is suggested that a Special Purpose Vehicle (SPV) may be formed between state government, central government and private players for which interest from the state governments/UTs is requested during the meeting.

**Floating Jetties for Marine Operations & Seaplane Services**

Floating jetties are widely used in other countries. The floating jetties have unique advantages in comparison with the convention jetties, like cost-effectiveness, speedy construction, minimal environmental impact, flexibility to expand and relocate, suitable for the locations with high tidal variation etc.

National Technology Centre for Ports, Waterways & Coasts (NTCPWC), IIT Madras was given the mandate to prepare the Detailed Project Report for developing more than 150 floating jetties across Indian Coastline and the work is in progress. It is proposed to utilize the floating jetties majorly for fishing harbours/fish landing centers, and seaplane operations.

The MoPSW informed that the states/UTs are encouraged to explore using floating jetties/platforms for their project and requested states/UTs to identify more locations for developing floating jetties. Projects may be considered for funding from Sagarmala after the due approval of the proposal.

**Strengthening Indian Infrastructure through Sagarmala Programme and National Infrastructure Pipeline (NIP)**

The MoPSW has various infrastructure projects that are undertaken under Sagarmala Programme and National Infrastructure Pipeline (NIP).

The MoPSW proposed to develop 802 projects worth investment of Rs.5.53 lakh crore for implementation under the Sagarmala Programme. Out of which, 168 projects worth Rs. 87,000 crore have been completed and 242 projects worth Rs. 2.18 lakh crore are under implementation. Similarly, MoPSW is handling 123 projects amounting to Rs. 1.28 Lakh cr. under NIP initiated in 2020. In addition, there are 1226 projects under Sagartat Samridhhi Yojana for coast led prosperity, out of which 192 projects are under implementation.

The MoPSW requested the coastal states/UTs to expedite the implementation of the projects where the state government is the implementation agency, and funding support can be considered for central funding via grants from MoPSW or via equity funding through Sagarmala Development Company Ltd (SDCL).

Speaking on the occasion, the Minister of MoPSW emphasized the pertinent and urgent need for infrastructure development be it port augmentation, multi-model connectivity through rail/road infrastructure and various project initiatives undertaken through the Sagarmala, National Infrastructure Pipeline, and Sagartat Samridhhi Yojana.

The meeting was attended by Shri. Ahmed Devarkoil, Minister of Ports, Kerala, Thiru E.V.Velu, Minister for Public Works, Tamil Nadu, Shri Aslam Sheikh, Minister of Textile, Fisheries and Port Development, Maharashtra, Shri Michael Lobo, Minister for Science and Technology, Waste Management, RDA and Ports, Goa, Shri. Mekapati Goutham Reddy, Minister for Industries, Commerce, Information Technology, Andhra Pradesh, Shri. Padmanabh Behera, Planning & Convergence, Commerce & Transport, Odisha, Admiral D K Joshi (Retd), Lieutenant Governor, Andaman and Nicobar Islands along with the representatives from the States. The meeting was also attended by representatives and officials from allied Ministries.

**MSDC Background:** MSDC is an apex advisory body for the development of the Maritime sector and aims to ensure integrated development of Major and non-Major Ports. The MSDC was constituted in May 1997 to assess in consultation with State Governments, the future development of existing and new Minor Ports by the respective Maritime States either directly or through captive users and private participation. Further, MSDC also monitors the development of minor ports, captive ports and private ports in the Maritime States with a view to ensure their integrated development with Major Ports and to assess the requirements of other infrastructure requirements like roads/rail/IWT and make suitable recommendations to the concerned Ministers.

# Freight forwarding market recovering, expected growth of 11.6% in 2021

LONDON: Transport Intelligence's (Ti) latest report, Global Freight Forwarding 2021, shows the post-Covid-19 global forwarding market is settling into its recovery phase after dramatic contractions in 2020.

However, market dynamics remain skewed with limited capacity available and sky-high freight rates presenting a challenging market for shippers and opportunities for forwarders to secure high margins.

The Global Freight Forwarding market contracted by 8.7 per cent in 2020, recording its worst year since the financial crisis as a result of the pandemic. The sea freight forwarding market contracted by 3.8 per cent in 2020, but air freight forwarding suffered worse with a decline of 12.3 per cent. However, the freight forwarding market is expected to bounce back strongly with growth of 11.6 per cent in 2021 and a CAGR of 5 per cent from 2020-2025 as volumes recover.

The sea freight forwarding market is set to grow at 7.6 per cent in 2021 and at a CAGR of 4.5 per cent from 2020-2025. Growth in 2021 will largely be driven by the bounce back in volumes from 2020, particularly in Q2 2021 vs Q2 2020. Sea freight forwarding growth out to 2025 will be driven by the ongoing recovery in volumes, modal switches from air to sea and new trade agreements generating more trade.

Air freight forwarding is set to grow at 14.9 per cent in 2021 and at a CAGR of 5.4 per cent from 2020-2025. Growth in 2021 is largely driven by a recovery of volumes from 2020 and very high freight rates. Longer term growth out to 2025 will be driven by a recovery in global trade and strong growth in air freight

intensive sectors like high tech, pharmaceuticals and cross-border e-commerce.

The new report also shows that amid all the disruption to the air freight market the top 20 freight forwarders have significantly increased their share of overall volumes, from 65.05 per cent in 2019 to 74.89 per cent in 2020. The top 20 actually increased the air freight volumes they handled in 2020, despite market volumes declining by 12.50 per cent. Coupled with the high air freight rates that persisted through 2020, this led to a good year for large forwarders.

The sea freight market also saw volumes decline from 2019, with 9.95 per cent fewer containers handled in 2020. Nevertheless, capacity constraints and high freight rates enabled the top 20 forwarders to broadly maintain their revenues, even though they carried 7.49 per cent fewer containers than in 2019.

'A tumultuous 2020 saw major disruptions in supply chains the world over with the ability of forwarders' to keep goods moving severely tested by shocks to supply and demand, carriers greatly reducing capacity, and congestion at logistics gateways, amongst other forces,' said Nick Bailey, Ti's head of research.

'Although the market saw one of the sharpest contractions in recent memory in real terms, sky high rates resulted in record-breaking top-line performance for many forwarders. The pandemic also accelerated digitisation and digitalisation efforts across the market as speed, agility and responsiveness proved highly valuable capabilities during the crisis.'

## Cochin Port Trust aims to get world-class facilities

COCHIN: The Cochin Trust (CPT) has signed 27 MoUs, recently, with various organizations aimed at transforming the port into a truly one, increasing its competitiveness and offering more services to its stakeholders.

"What we are doing is to identify the potential of the port and exploit those opportunities to the maximum. For example, our MoUs with Indian Oil Corporation Ltd and Bharat Petroleum Corporation Ltd (BPCL), realized from the fact that one of our strengths is liquid cargo. So, when we initially identify the potential areas, we focus on those areas which have a growth potential and discuss with the stakeholders in those areas, finally reaching the MoU stage," said CPT Chairperson Ms. M Beena.

According to her, the projects will be completed within a two-year period. "We are progressing with the target of bringing a visible change and hence we are aspiring to finish the projects by 2024," Beena added.

Manufacturing industries usually serve as the main source of inward or outward cargo movement for any port, but in Kerala, the story is different. CPT's hinterland so lacks a healthy manufacturing industry. Further, there is Tuticorin Port which is a competitor as it is equidistant to the Port, for those industries in southern Kerala.

With this background, CPT is coming up with the new projects with an overall project cost of Rs 3,108 crore. The port is providing the land and the entities concerned are investing

there to set up the necessary infrastructure.

For development of the port, four MoUs with a total project cost of Rs 989 crore were signed. Establishment of a multispecialty hospital at a cost of Rs 175 crore, connecting Cochin Port with minor ports in the state and establishing a multi-modal logistics hub, seaplane connectivity between Kochi and Lakshadweep, deepening and broadening of channels, building a cryogenic warehouse, cement importcum-bagging terminal, aviation fuel terminal, port-based edible oil refining unit at Muvattupuzha, petrochemical terminal, coir product consolidation centre are some of the projects CPT is pursuing now.

A container freight station for coastal cargo — for destuffing of containers, storage and warehousing is also part of the new projects.

Cochin Port has signed a MoU with Kottayam Port and ICD Services for offering inland container depot services for exim (export-import) as well as coastal cargo, linked through national waterway. Also, BPCL will develop HSD export facility at MULT (multi-user liquid terminal) at Puthuvyppe, as part of the various projects envisioned by the Cochin Port.

Ms. M Beena

## Drewry's World Container Index experiences its steepest ever climb

LONDON: Shippers hoping for some pricing respite from ocean carriers have been battered this week by further records falling. Drewry's World Container Index, published recently, saw its steepest climb since its inception in 2012.

Drewry's composite World Container index rose a further 15.9% or \$1,104 to reach \$8,061.65 per FEU, which is 332% higher than the same week in 2020.

Rates from Shanghai to Los Angeles increased by more than a third in the space of week, from \$6,358 per FEU last week to \$8,548 this week. Rates from Asia to US east coast also soared 39% to \$11,180 per FEU.

Spot rates on Shanghai-Genoa increased \$603 to stand at \$11,448 for a 40ft box, which is 540% higher than same period in 2020. Similarly, rates on Shanghai-Rotterdam gained \$779 to reach \$11,975, a year-on-year change of 626%.

"Drewry expects rates to remain on the higher side in the coming week," the UK analysts stated.

Meanwhile, the Shanghai Containerized Freight Index (SCFI) climbed another 37 points recently to a new record of 3,785.

Commenting via LinkedIn on the latest record-breaking box figures, Lars Jensen, CEO of consultancy Vespucci Maritime, stated: "I would expect upwards pressure on essentially all headhaul

## Forex reserves decline \$4 bn to \$603.93 bn on slide in Gold assets

MUMBAI: Sliding from a lifetime high, the country's foreign exchange reserves declined by \$4.148 billion to reach \$603.933 billion for the week ended 18 June due to a fall in gold and currency assets, the Reserve Bank of India (RBI) data showed.

The forex kitty had surged by \$3.074 billion to a record high of \$608.081 billion in the previous reporting week.

According to the data by the RBI, the foreign currency assets

(FCA), a major component of the overall reserves, declined by \$1.918 billion to \$561.540 billion for the reporting week.

After a \$490 million rise in the previous week, the gold reserves declined by \$2.170 billion to \$35.931 billion, the RBI data showed.

The special drawing rights (SDRs) with the International Monetary Fund (IMF) dipped by \$14 million to \$1.499 billion.

# Gujarat unveils its 1st Integrated Logistics & Logistics Park Policy

## Gives yet another push to its growth story

Cont'd. from Pg. 3

The policy is aligned with the draft National Logistics policy which focuses on driving the country's economic and trade competitiveness through integrated, seamless, efficient, reliable and cost effective logistics network by leveraging technology, innovation and skill enhancement.

The global supply chain changed significantly last year because of the pandemic and many companies are shifting their operations in India. The state has seen an increase in investment especially in the manufacturing sector. The policy's timing is thus fitting. A robust network of logistics will give a competitive advantage to the state which will help attract more investment and support businesses grow.

It is worth mentioning that Gujarat ranked no. 1 in the Logistics Ease Across Different States (LEADS) Index instituted by Ministry of Commerce & Industry both in 2018 and 2019. The index benchmarks logistics performance across the states. Some of the evaluation parameters of the LEADS index 2019 included availability and quality of logistics infrastructure, ease of track and trace, quality of logistics services, timeliness of cargo delivery, state facilitation and coordination, efficiency of regulatory processes, etc.

Gujarat is a forward looking state and the government understands that logistics is the backbone of its manufacturing sector. As such, many futuristic projects are already underway. For example, nearly 560 kms of the Dedicated Freight Corridor (DFC) will pass through Gujarat, along which freight logistics parks have been planned to enhance rail-based traffic. The expected investment in this project in Gujarat alone is about INR 7,000 crore. The Ahmedabad Dholera Expressway which is 110-kilometre long and six-lane expressway is also under construction. The expressway

will connect Dholera Special Investment Region (SIR) and proposed Dholera International Airport with Ahmedabad. Development of around 11 jetties and various ports have been planned. Around 7 rail connectivity projects have been proposed for providing connectivity to industrial areas such as rail line connectivity to Hazira port and industries in the Hazira area to DFC. Existing rail lines are also being enhanced. Gauge conversion project is being undertaken on Katosan- Becharaji- Chanasma- Ranauj line. Other rail line projects to provide first and last mile connectivity to ports such as New Bedi & Rozi, Nargol, etc. have already been envisaged by the state government.

Gujarat's logistics policy was prepared after an in-depth analysis of cargo movement data, review of draft national logistics policy, benchmarking study of policies of other states covering one or more areas of logistics and detailed discussions with government and private stakeholders to identify objectives and support areas.

As such, specific incentives and support mechanisms have been identified under this policy to promote private sector investment and make the logistics network more efficient. For example, capital subsidy to the tune of 25% of the eligible fixed capital investment (EFCI) shall be provided for construction of logistics facilities and development & mechanization of new jetties with a cap of INR 15 crore. Interest subsidy at 7% for 7 years on eligible loan term will be extended with a cap of INR 50 lakh per annum. To bring down the capital cost, the government will also reimburse 100% stamp duty.

Such thrust to infrastructure development needs to be complemented by skilled manpower. The policy focuses on skill enhancement which will improve the employability of our youth. Up to INR 15,000 per trainee for more than 120 hours

of training will be reimbursed. In case of women trainees, 100% fees will be reimbursed with the intention of increasing their participation in this sector. Other assistance related to quality certification, patent, R&D will also be provided under this policy.

Another salient feature of the policy is its focus on technology and quality enhancement of logistic services. Specific support will be given to private companies to adopt disruptive technologies to increase their efficiency and visibility across the value chain including improved tracking of cargo. This will improve the quality of services and will benefit the end user immensely. Greater efficiency in the logistics network will also reduce the overall cost for the end user.

Officials also mentioned that transport is looked as a key contributor to CO2 emissions. Any policy should thus focus on decarbonizing this sector. Gujarat's Integrated Logistics and Logistics Park policy addresses this concern by extending support to R&D and innovation to make this sector sustainable and environment friendly.

A statewide logistics masterplan will be developed as part of this policy which will study the utilization of the existing infrastructure and accordingly identify strategic locations for new projects across the state. This will be done through rigorous coordination with over 10 government departments and agencies such as Ports & Transport department, Roads & Buildings department, GUJSAIL, G-Ride, GIDC, GMB, etc.

Considering it a game changer, it is learnt that a separate team of experts will be constituted to implement the objectives of this policy and promote its widespread adoption. These experts will also coordinate with private players and trade associations to identify new initiatives that can be undertaken to make Gujarat a leader in the logistics sector.

## Need to look at leveraging the Anti-China sentiment: FIEO

NEW DELHI: The second Covid wave has left the economy in tatters. Amid all the gloomy news, the country's exports seem to have done well.

At the moment, the growth is looking spectacular. But it is on a very low base. We have to keep in mind that we were under lockdown because of the second wave of Covid from the second half of March to May this year. Therefore, these figures might look very impressive, but it is best not to draw conclusions from that. According to the data available with the government in May, India's exports reached \$50.7 billion during the first seven weeks of the fiscal year, 11% higher than the corresponding period in 2019-20, said FIEO CEO Ajay Sahai recently. A double-digit growth at this point is a good sign for Indian exports, considering that some states are still in the lockdown mode. We have done remarkably well in some labour-intensive sectors. Compared with 2019, the export figures are encouraging in 2020, particularly in the agriculture and processed food sectors. The latter has done very well as China's exports in this category

have taken an enormous hit. After Covid, countries are reluctant to import edible products from China. India can take its place. It is a good opportunity, but we still have a long way to go.

There will be competition from other countries, but if we focus on the processed food sector, we can make a difference. The PLI (production-linked incentive) scheme for this sector has helped India in a huge way. We are wasting around 30% of fruits and vegetables. This can change if we bring proper technology into this sector through FDI (foreign direct investment). The added advantage is that you get a new market to sell your products. So, it's a win-win situation for both the countries. I'm very bullish about the PLI scheme in the food processing sector.

On commodity prices soaring, he opined, the soaring prices have resulted in around 10% growth in exports. We have done particularly well in exports of iron and steel, copper and various other metals. The same goes for cereals as well. But it's a very delicate situation. On the one hand, we see exports booming, on the other, it creates problems for the downstream processor

because high steel prices have hit the engineering sector. We should have a strategy where we can focus on value-added exports and attract investment. A medium-to-long-term process is required here.

As an immediate step, we need to look into what we can do to encourage raw material exporters to supply to the non-value added exporters. There are many cases where the same product is being exported and imported to and from India by different units. In this process, we are not only putting pressure on the logistics sector, which is facing its own challenges, but we are unnecessarily spending foreign exchange in freight, both ways. A change in the policy will help us address that.

I take little satisfaction from the export of raw material scenario at present. I understand that exporting raw material is needed, otherwise it will suppress prices in the domestic market, but if we go overboard, then it will create a problem. A competitor in another country can get the raw material and if they have economies of scale, they can produce the final product at a much more competitive price and then beat us in the third market.

# Advanced Seafarers Wellness Centers to be provided at all ports: Shri Mansukh Mandaviya

- 'Day of the Seafarer 2021' celebrated virtually
- 'M.T. Swarna Krishna' being the 1st Indian Flag Vessel of Shipping Corporation of India with all Women Officers onboard awarded

NEW DELHI: 'Day of the Seafarer-2021' was celebrated virtually on 25th June 2021 in the presence of a huge number of Maritime personalities, Seafarers and families in India and abroad by remembering the great efforts made by the seafarers to the civil society, giving thanks to them for their contribution to the world economy and appreciating the risks and personal costs they bear while on their jobs.

Shri Mansukh Mandaviya, Minister of State (I/C) for Ports, Shipping & Waterways and Minister of Chemical and Fertilizers offered his greetings to seafarers in his video message. The Minister assured that Advanced Seafarer Wellness Centers will be provided at all the ports. He mentioned that Government has planned in Maritime Vision 2030 for raising the number of Seafarers from 2,40,000 to above 5 Lakhs in the next ten years. Shri Mandaviya also wished that the share of the Women seafarers shall be increased and the Maritime Training Institutes in India shall be prepared to impart the best training to the seafarers considering the new challenges in the shipping sector. The Minister also mentioned that Government has created a fund of welfare of the seafarers.

'M.T. Swarna Krishan' being the 1st Indian Flag Vessel of Shipping Corporation of India with all Women Officers onboard was awarded in this function and the crew members

shared their experience of the voyage on this historic vessel in India.

The meritorious seafarers were awarded for their excellent academic achievements in the year 2020. The seafarers and their family members presented lovely cultural performances.

The Chief Guest of the function, Dr. Sanjeev Ranjan, Secretary, Ministry of Ports, Shipping & Waterways greeted to all the seafarers and their families on this day and appreciated the tremendous contribution made by maritime community in keeping the global supply chain intact during the challenging times. He expressed that development of new skill sets in the shipping industry shall be encouraged in the youngsters to create skilled manpower.

While addressing the gathering, Shri Amitabh Kumar, Director General of Shipping informed the steps taken by the Government for the benefits of seafarers and their families. He mentioned that the seafarers will be helped in getting complete doses of Covid vaccination in time. He informed that dual degree courses in nautical and engineering disciplines having emphasis on the new technology will be introduced from next academic year to make the seafarers ready to accept new challenges to bridge the gap in traditional and modern technology in the shipping sector and keep their employability intact. He expressed that there is a need of increased participation of the women in maritime sector for enhancing the productivity, efficiency and discipline.

A video message of Mr. Kitack Lim, Hon'ble Secretary General, International Maritime Organization (IMO) was played wherein he expressed that Seafarers continue to deliver for all of us and now, let's ensure that we deliver for them.

Shri Atul Ubale, Chairman, National Maritime Day Celebrations (Organizing) Committee welcomed all dignitaries in the program and explained background of celebration of this Day.

Dr. Raut Pandurang, Member Secretary, NMDCDC (Central) Committee presented the vote of thanks and the programme concluded with the National Anthem.

## Need to raise MSMEs' share in India's Exports : Nitin Gadkari

MUMBAI: Despite the pandemic-induced slowdown, Indian merchandise exports have been growing well, to an all-time monthly high of \$32.27 billion in May, showing broad-based recovery from last year.

Small businesses are a mainstay of this performance, accounting for around half the country's merchandise exports. Commerce Secretary Anup Wadhawan has pegged merchandise exports to cross the targeted \$400 billion this year. Going forward, to achieve the Prime Minister's goal of a \$5 trillion economy, Indian exports (merchandise and services) would have to increase from \$526.55 billion in FY 19-20 to about \$1 trillion.

With that target in mind, the current contribution of the MSME sector to merchandise exports would have to at least double from \$150 billion to \$300 billion. In addition, Nitin Gadkari, the minister for MSME, has time and again highlighted that MSMEs are poised to increase their contribution to India's merchandise export to 60 percent over the next couple of years.

As we target Indian exports to increase, along with a higher share for MSMEs, it would be prudent to evaluate the preparedness of MSMEs on multiple dimensions. This exercise is even more crucial now as we await India's new Foreign Trade Policy 2021-26 slated for release in the next couple of months.

The upcoming policy is expected to be aligned to achieving the goal of a \$5 trillion economy, and the 2019 report of the High-Level Advisory Group (HLAG) on trade had a number of proposals including strengthening EXIM Bank credit, using data analytics for an export strategy, optimise FTA (Foreign Trade Agreements) negotiations and usage, increase investments in infrastructure, especially ports, reduce logistics costs, etc.

The current Foreign Trade Policy 2015-20 mentions MSMEs only twice over its extensive 164 pages. Given the significant role of MSMEs in achieving these macro goals, it would be fair to expect more detailed attention given to MSMEs in the upcoming

Foreign Trade Policy. What impacts MSME exporters the most is lack of awareness and knowledge of government schemes and international export/import standards, inadequate understanding of processes and documentation, low garnering of export credit, lack of access to markets. These have also been highlighted in the report by the HLAG on trade, along with its recommendations.

However, the effectiveness of policy lies in its implementation. Though the extant policies cover various areas affecting MSMEs, the 'implementation to intent' ratio is very small and leaves much more to be desired. One of the primary reasons for unsatisfactory implementation is inadequate State capacity. For a department that is expected to look after and promote more than 60 million MSMEs, there are not more than 500 employees to do so, which is terribly inadequate.

This bandwidth needs tactful expansion. One established option to do so is to use industry associations all over India that are used to interacting with both the government and the industry, especially MSMEs. Some of these industry associations are already authorised to issue some export documents for exporters.

Industry associations also conduct various programmes to educate the aspiring and existing exporters. The bandwidth of these industry associations can be utilised to increase the breadth and depth of engagement with exporters. The much-awaited Foreign Trade Policy 2021-26 should ensure maximising this collaboration.

Further, our embassies and trade commissions abroad are also in dire need of increased capacity. Each of these bodies have a limited bandwidth of not more than two officers who look after the trade division, while some countries such as the United Kingdom and Germany deploy dozens or even hundreds of employees in their trade and investment divisions in various countries, including India. The strength in India's missions in strategic partners must be increased substantially to promote Indian businesses and trade in those countries.

# GCCI, GDMA organized a webinar on “Direct Export by Rail from ICD Khodiyar to Bangladesh”

CONCOR speaks on present services available, procedure, tariff, benefits, etc.

AHMEDABAD:  
Gujarat Chamber of  
Commerce &  
Industry (GCCI) and

Gujarat Dyestuff Manufacturers Association (GDMA) organized a webinar for their members to create awareness of land movement by Rail to Bangladesh from ICD Khodiyar.

The webinar was conducted on 23rd June, wherein 100+ members participated to understand the customs cleared export shipment by Rail to Bangladesh from their hometown.

In a welcome address, **Mr. Natubhai Patel, President, GDMA** cited that “Bangladesh is one of the rising countries, in not only in Asia but in the world today, being a young country only 50 years, remarkable progress in sustainable economic growth has happened in last decade. Readymade garment and frozen sea food have attracted lot many countries to import from Bangladesh. The trade between two countries India and Bangladesh is approx. USD 10.0bn. including exports worth USD 8.50 bn with various products which includes Cotton bales, rice, sugar, machinery, organic chemical, pharma, plastic, leather etc. India is also importing worth USA 1.3 bn in return, mainly edible oil,

Prakash Chemicals International Pvt Ltd loaded in CONCOR owned containers from ICD Ankleshwar on 11th this month. The containers were cleared from Customs at ICD Ankleshwar itself and the train moved to Majerhat Terminal of CONCOR at Kolkata for further movement to Benapole.

CONCOR has 20 ft Side Access (SA) containers from which cargo can be directly offloaded at Benapole while on wagon only. Mr. Roat explained its benefit of movement by rail – clearance & documentation at ICD Ahmedabad, Sealed with e-seal ‘ECTS’ by CBIC, CONCOR’s huge inventory of empty containers at ICD, time and cost saving, trace & track system.

garments made-ups, Hydrogen peroxide, caustic live etc, because energy cost is almost 50% that of in Indian. Bangladesh is important for the exports of Dyestuff material, pharma, rice, plastic granules from Gujarat, Sugar from Maharashtra and organic chemicals from both the states.”

He emphasized on Rail-road movement to reduce the logistics cost, improve speedy delivery and to avoid the Chittagong boarder hurdles and welcomed CONCOR dignitaries to inform about exports through Rail to their members for win-win situation.

**Rameshbhai Patel, President, GCCI** welcomed members of GDMA, GCCI and introduced CONCOR officials.

**Container Corporation of India Ltd (CONCOR)’s Senior Officers Mr. A. Vaasudeva Rao, Executive Director, Head-Area-II (West) of CONCOR, Mr. Alok Badkul, Executive Director, Head Area-IV (East) and Mr. Madhukar Roat, CGM/Ahmedabad Cluster** spoke about present rail movement by CONCOR to Bangladesh, procedures for exports from ICDs, tariff, benefits to trade, role of each stakeholder, potential, challenges and its ambitions, etc.

**Mr. Madhukar Roat** explained about CONCOR’s first train movement from Gujarat, moved with chemical cargo of

He added, the awareness of such movement is less in the Ahmedabad market and, therefore, he appreciated GCCI and GDMA for organizing such webinar for sharing all the information pertaining to export to Bangladesh to Benapole.

**Mr. Vaasudeve Rao**, explained the benefits of movement of export by rail against the export by via Chiatagong port, which is already operating 6-7 times beyond its capacity leading to holding of vessel, containers at CFS, congestion on road-route leading to border waiting time and higher cost.

Mr. Rao explained that India is adopting multi-pronged strategy to enhance trade and business partnership with Bangladesh, when China is strategically trying to woo Dhaka with its duty-free access to its product. He further added that Bangladesh is one of the 10 largest export destinations for India with \$9.21 billion. The major export commodity that are moved by CONCOR are Cotton, Vehicles, Minerals, fuels, nuclear reactors, Iron & Steel, cereals, electrical equipment, Plastic articles, etc.

He added that if 10% of road traffic to Bangladesh is diverted in Rail, CONCOR will be able to capture 10 trains load traffic a month. With the growth potential of Bangladesh, return traffic will help further to reduce the logistics cost. He mentioned that CONCOR has suggested various measures to the authorities of Bangladesh, for improvement in the logistics facilities such as One-stop Logistics Park, Interim arrangement with Customs at BBW, Transit terminal developments, modification in SRO, Train accepting capacity, permission for all kinds of wagons, etc.

CONCOR has started Bangladesh movement in April 2018 from North to Bangabandhu station in Bangladesh and moved around 11 trains with 60 TEUs each train, during the pandemic period. Mr. Alok Badkul clarified the process of movement from their CFS Majerhat in Kolkata to Benapole and potential of exports from Gujarat.

CONCOR complimented the efforts made by the GCCI and GDMA for creation of this awareness and also appreciated the interest of Gujarat trading community in the business.
