## NO HOLDS BARRED

*"Hum Angrezon Ke Zamaane Ke Jailor Hain"*, Asrani spoofed Charlie Chaplin in *Sholay*. This evoked viral humour. Humour comes from sharp unexpected outcomes. And what was the unexpected part in what Asrani said? The unexpected part was our hypocrisy in not openly admitting the facts that the British colonists did a far better job in managing our jails than we did in a free India. We know this and yet it's politically incorrect to voice this in the open. After all, they were our erstwhile oppressors. We still live in that kind of denial of truth.

You would say, how is this related to our so-called port sector reforms of 2021? There is a strong connection here. Indian Ports Act was framed in 1908. Same was amended in 1963. And again in 2021. The basic framework of 1908 still stands. What was eventually gouged out of it in 1963 was its central mechanism of efficiency or the mechanism of getting things done. This was done by putting in place a system to reward (power and perks) a collection of politically favoured and powerful people in place of a responsible and accountable conservator. And in 2021, that crowd was renamed, tweaked, made a bit smaller and given more power, like selling port lands or allowing private operators whatever tariff they fancied. That's all that was done after more than half a century of poor show by the Major Ports.

The British managed and developed our ports much more efficiently. Some would claim that they did this because they wanted to enrich themselves by exploiting our

## Power, perks & non-performance: The Major Port Authorities Act, 2021

**Capt. P. S. Rath, CMD, Econship Tech Pvt. Ltd**

resources and so on and so forth. But that's beside the point. The point is how they did it and can we replicate it? The 1908 Act mandated one conservator to be assisted by a deputy. The tariffs and macro rules were set by the central government. The conservator was in a leadership role to get things done. He was like a CEO. He could hire or fire. Nobody could mess or meddle with him. If he did not perform, he was replaced. Simple and straightforward. That's how things get done in an efficient organisation. And that's how efficiently the Indian jails were being run then.

Same was the case with the ports. Then we got independence and changed the rules of 1908 in 1963. We replaced the conservator with a Board of Trustees (17 to 19 trustees) headed by a Chairman and Deputy - a motley crowd to run & develop a port. The Chairman and the trustees were selected by the government(s). There was no requirement for qualification or competency other than what the central government deemed fit. The Act was more about 'Power & Perks'. Getting things done or performance was not even accidentally mentioned. The Act talked in length about power, perks and disqualifications (not qualifications), making it extremely difficult to remove a selected person - unless of course, he committed a murder or big crime and convicted. And until then, he could happily enjoy his power and perks in his tenure. At the same time, in the event where the Chairman wanted to act prudently and on time, there were 17 to 19 trustees

to breathe down his neck for their vested interests. Under such trying circumstances, where you are not even asked to perform, are throttled down by 17 to 19 persons (with no individual accountability) and are guaranteed your 'Power & Perks' for the full tenure, how would you perform? Therefore, our ports became progressively inefficient and costly. There were other things like setting up a body to set tariffs called TAMP and so on. Let's keep all those for another day.

The Board was like a politically-made heaven on earth. Only the favoured few would be sent there to enjoy power and perks with no requirement to perform. The change mandated the appointment of trustees from government departments (both centre and state), unions and such other interests as the Central Government deemed fit. Deemed fit is like a blank cheque. You could fill in what you wanted in future and encash it. Under "such other interests", they could pick a person(s) from shipowning or shipper and so on. There was intense lobbying to get into those slots. The result was for all to see - inefficiency and high costs. Luckily for us, some container terminals were given to private hands on a landlord-tenant principle and we saw positive outcomes. But again, these relationships were mired in disputes and absurdities, resulting in move-counts and their ill-effects. The end result is our terminals are far too inferior to support healthy international trade.

Act 2021 had to address all these problems - inefficiency, cost, performance, dispute resolution, fair pricing,

and so on. But what the Act did was ignore the basic issue of performance (inefficiency and cost). It's like old wine in a new bottle. The Board of Trustees was replaced with a Board with a slight reduction in no of members (earlier trustees). Being on the board entails benefits. It's all about how much you could extract - not contribute! Little wonder that a CM of a state came out complaining that he feared less representation from the state. Again this is all about power and perks - not performance! Therefore, it is not going to work. The solution lies in spelling out two things with absolute clarity in the Act - performance and leadership. **Performance-efficiency and cost. Both are simple numbers. Number of moves per hour per gantry (averaged annually) must go up. Cost per move must come down. A timeline should be given to the Board. Second, the Board should be authorised to appoint one professional (a CEO or conservator) to achieve the set performance. The perks and pay of the Board should be linked to performance. If the Board fails, they should not be entitled to the perks. A new Board should be put in place. Review should be done annually by the central government. The Act has addressed other issues like tariff pricing, sale or use of port lands, dispute resolution, inactions by Board, investment, development, etc. Some are good. Some are not that good. We will discuss them another day. (The author's views are personal.)**

## Gujarat Maritime Cluster aims to develop a marine insurance ecosystem in Gujarat

Exim News Service

GANDHINAGAR, June 30

**G**UJARAT Maritime Cluster organised a webinar on June 25, 2021 as a part of its Gujarat Maritime Cluster webinar series, to discuss about the prospects of setting up an eco-system of marine insurers and reinsurers within the Gujarat Maritime Cluster coming up at GIFT City.

Capt. Savraj Mehta

Mr Anil Devli

The webinar was addressed by distinguished speakers, Mr Anil Devli, CEO, Indian National Shipowners' Association

(INSA), and Capt. Savraj Mehta, Chief Commercial Officer, North Group, The North of England P&I Association Ltd.

## Gujarat unveils its first Integrated Logistics & Logistics Park policy

Exim News Service

GANDHINAGAR, June 30

ONLY 2 days after releasing the EV policy, the Gujarat Chief Minister accorded in-principal approval to the state's first Integrated Logistics and Logistics Park policy. Believed to be a one of its kind policy, focusing on integrated logistics development and covering the entire value chain, it is expected to enhance Gujarat's industrial competitiveness manifold and create employment opportunities for the youth. **The policy provides support to all logistics facilities like logistics parks, warehouses, cold storage,**

## Gujarat Maritime Cluster

From page 3

The development of Gujarat Maritime Cluster by Gujarat Maritime Board (GMB), through its subsidiary company Gujarat Ports Infrastructure and Development Co. Ltd (GPIDCL), is envisaged with the impressive presence of leading shipowners, ship operators and charterers, ship managers, port operators, maritime consultants, ship recyclers, clearing & forwarding agents, key regulatory bodies, etc. Sensing the gap between demand and supply of certain key maritime support services, the Gujarat Maritime Cluster is also focusing on creating a sound base of specialised service providers engaged in the fields of marine insurance, marine law, ship finance, etc.

Presently, only ~8% of India's seaborne trade is being carried out by the Indian fleet, with the remainder being handled by foreign vessels. The

growth of Indian tonnage will be instrumental for the country to emerge as a marine insurance hub.

Gujarat Maritime Cluster intends to address the regulatory and taxation disparities between India and other leading maritime centres, enabling creation of a level playing field for the nation's maritime and shipping businesses. The inclusion of ship leasing as a permissible activity in IFSC as well as Gujarat Maritime Cluster's current attempts to rescind the payment of 'withholding tax' on payment of charter hire for the cluster members, could pave a new chapter in bringing ship operating and chartering services and subsequently shipowning and management from overseas maritime hubs to India.

"With the growth of trade and tonnage envisaged in India, it is imperative that our country not only has marine insurance/reinsurance capac-

ity for its own increasing needs, but also be able to provide this service to other countries to gradually become a frontrunner in this domain," said **Mr Anil Devli, CEO, INSA**. "It is fitting that Gujarat, the frontrunner maritime state in the country, takes a lead in filling the void in marine insurance ecosystem in our country. There is a strong merit in setting up the marine insurance ecosystem within the Gujarat Maritime Cluster (a strategic initiative by the maritime brand of India, Gujarat Maritime Board) in GIFT IFSC, by imbibing best practices from the leading maritime centres," he added.

The liberalised regulatory regime provided by the International Financial Services Centre Authority (IFSCA), with special carve out for IRDAI, shall facilitate Ease of Doing Business as well as competitive infrastructure for the marine insurers/re-insurers intended in the Gujarat Maritime Cluster, in addition to the

various fiscal incentives in the form of exemptions and concessions (entailed with IFSC business platform at GIFT City).

"India will need to focus on the infrastructure requirements in terms of reinsurance arrangements, customer service, support teams, regulatory compliances, diversified portfolio (in terms of ownership and types of ships), knowledge database and expertise (including claim settlement on international timescales) to build its reinsurance capacity," said **Capt. Savraj Mehta, Chief Commercial Officer, North Group, The North of England P&I Association Ltd**. "Subsequently, India will need to build a roadmap to develop capacity for free reserves for P&I insurance," he added.

The webinar witnessed participation from over 100 prominent players of the maritime and insurance fraternity as well as from the wider industrial base in India and abroad, informed a release.

## Survival of import coal handling terminals seen needing MoPSW policy intervention

Exim News Service

VISAKHAPATNAM, June 30

THE survival of import coal handling terminals urgently needs policy intervention by the Ministry of Ports, Shipping & Waterways (MoPSW), to mitigate the impact of policy reforms of the government in promoting domestic coal availability and utilisation, stressed a recent communiqué by the Indian Private Ports and Terminals Association (IPPTA) to the Ministry, it is learnt. The letter points out that it is essential to maximise the capacity utilisation of port assets with increase in efficiencies, which will prevent them from being converted to non-performing PPP assets.

It was emphasised that the many policy reforms of the Coal, Power and Environment & Forest Ministries for promoting domestic coal availability and utilisation have been resulting in reduced import coal volumes, thereby impacting the viability of import coal handling terminals. Hence, if policy reforms in the port sector do not happen to match the pace of reforms in other sectors, there will be non-performing assets and a spate of disputes.

Due to the change in policies, and the Covid situation, thermal/steam coal traffic has reduced significantly at key ports like Kolkata, Visakhapatnam, New Mangalore and Kamarajar, with the overall decline being to the extent of 15.4 per cent at all the Major Ports for FY21 compared to the previous year. Major problems are being faced by

single commodity handling terminals in India, requiring urgent policy intervention, the communiqué stressed, as per a report.

## Port of Antwerp reaffirms role as major entry point to a strong European internal market

**L**AST week, Port of Antwerp CEO Jacques Vandermeiren met up with European Internal Market and Industry Commissioner Thierry Breton at the Port of Antwerp to discuss the port's role as a strategic transport, energy and industrial hub in Europe, said a release.

After a guided tour around the port, Mr Breton and Mr Vandermeiren sat down together to discuss a wide array of important topics ranging from sustainability and digitisation to themes like the value of logistics chains, the impact of

Brexit on shippers of goods to and from the United Kingdom, and the **merger of the Port of Antwerp with Port of Zeebrugge that is expected to settle at the end of this year.**

European ports have proven to be resilient and essential to a strong and internationally well-connected European Internal Market, especially the past one-and-a-half year. **Port of Antwerp has the ambition to play a pioneering role in the transition to a climate-neutral society and economy by 2050, as set out by the European Green Deal.**

**Port of Antwerp**

Said Ms Annick De Ridder, Port alderman: "Our port serves as a major and essential entry point to the European internal market as it offers the vital link to both businesses and EU consumers/citizens. **Thanks to the agility, dedication, knowhow and resilience of our thousands of employees, we were able to achieve a continuous 100% operational status during the Covid-19 crisis.** As a home port we remain ever determined in our mission to facilitate and increase leverage towards a true sustainable future."

## Seaports join forces to cut emissions from berthed vessels

**F**IVE seaports in North-West Europe have agreed to work together to make shipping cleaner. The aim is to provide large container ships in the ports of **Rotterdam, Antwerp, Hamburg, Bremen and Haropa (including Le Havre)** with shore-based power by 2028 so that the on-board generators are not used when the vessels are

berthed. Vessels will then be connected to the mains power grid through a cable. That is good for air quality and for the climate as it will mean lower nitrogen and CO<sub>2</sub> emissions.

The implementation of shore power is complicated. For instance, there is uncertainty about future policy, European or otherwise, regarding whether or not shore-based power should be made compulsory. International regulations will be needed so that ports spearheading sustain-

ability do not lose their competitive position. Investments in shore-based power cannot be avoided now: major infrastructure investments are required and these cannot be made without government support. Moreover, there are still too few readymade solutions for the integration of shore-based power on busy quays. At present, only a limited number of container ships are fitted with shore-based power connections. Consequently, no European terminals have shore-

based power facilities for large container ships. Finally, the current tax rules are unfavourable for shore-based power: for the time being, electricity is not subject to energy tax and marine fuel is tax-exempt in most ports.

### Shore-based power for container ships by 2028

The said ports have therefore agreed to make a joint commitment to providing shore-based power facilities for container ships from 14,000 TEU upwards by 2028. In this segment, it is becoming increasingly common for new vessels to be fitted with a shore-based power connection. To demonstrate their commitment and make a clear statement, these ports have signed a Memorandum of Understanding to show that they will do everything they can to create the necessary conditions and a level playing field to facilitate the implementation of shore-based power for their clients.

In addition, the ports are jointly calling for a clear European regulatory framework for the use of shore-based power or an equivalent alternative. They are also asking for an exemption in energy tax for shore-based power and sufficient public funds to realise these shore-based power projects, said a release.

### Egypt Customs announces postponement of Advance Cargo Information requirement to Oct. 1

**I**N addition to the previous announcement dated May 31, 2021 regarding the new Egyptian Customs law #207/2020 effective as of November 2020, and its following related decree for Advance Cargo Information (ACI), the legislation date, which was originally scheduled as of July 1, 2021, has been postponed until October 1, 2021 (ETA 1st POL).

The Minister of Finance in Egypt announced, in response to the requests of the business community and international companies, that it will allow additional time for them to join the ACI system as continuation of the experimental application for shipments in seaports until the end of September and the mandatory application from October 1, said a release.

## Hapag-Lloyd & ONE complete integration onto TradeLens platform

**H**APAG-LLOYD and Singapore-based Ocean Network Express (ONE) Pte. Ltd have announced they have completed integration onto the TradeLens platform, helping ensure a more timely and consistent view of logistics data for their containerised freight around the world. TradeLens is a neutral, third-party platform launched by  **Hapag-Lloyd** and A.P. Moller-Maersk to help modernise the world's supply chain ecosystems and is run on IBM Cloud and IBM Blockchain. 

Since the completion of multiple pilot projects as well as the integration, Hapag-Lloyd and ONE, the world's fifth and sixth largest carriers respectively, are now working to help their clients and business partners across all major geographies benefit from TradeLens' ability to increase efficiency and improve access to information. They join foundation carriers A.P. Moller-Maersk, as well as CMA CGM and MSC Mediterranean Shipping Company (MSC) who both completed their pilots and integration in October 2020, and five other carriers already inputting shipping data into the TradeLens platform.

Additionally, TradeLens continues to rapidly on-board new organisations from across the shipping industry, recently adding shippers and importers which use the platform to address back office inefficiencies and improve the visibility of cargo, as per a release.

# Qatar Airways Cargo launches WebCargo by Freightos throughout the European region

**Q**ATAR Airways Cargo has announced that WebCargo by Freightos will be introduced across the European region (excluding Armenia, Bosnia and Herzegovina, Russia, Slovakia and Slovenia) effective June 30, 2021. Forwarders will be able to conduct eBookings with access to live rates and available capacity on the WebCargo platform.

With the implementation of WebCargo across Europe, the total count of countries in the airline's network on the platform will increase to 32. This will allow customers to further digitalise their experience with the airline in the region, resulting in more process efficiencies and faster market responses, emphasised a release.

Qatar Airways Chief Officer Cargo, Mr Guillaume Halleux, said: "We are glad to further roll out the third-party eBooking platform, WebCargo throughout Europe, as we aim to provide digital connectivity for our customers and extend digitalisation across our operations. This will bring in more efficiencies in the supply chain and provide multiple benefits for our customers. Our aim is to gradually roll out WebCargo throughout our global network during the year, providing convenience and transparency to our customers."

Mr Zvi Schreiber, CEO of Freightos Group, said: "We are so proud to have partnered with

Qatar Airways Cargo, the world's number one cargo airline, on driving global Digital Air Cargo (DAC) adoption. The hyper growth of our eBookings in the last few months (up 1,000% year-on-year) has proven that forwarders are very keen to adopt real-time pricing, capacity and eBookings, particularly in today's volatile market. Ultimately, this allows them to deliver better air cargo to importers/exporters. With today's significant expansion of our partnership with Qatar Airways Cargo, we are excited to drive a further acceleration of digital air cargo bookings in Europe."

Since the introduction of WebCargo this February in France, Germany, Italy, the Netherlands, South Africa and Spain, Qatar Airways Cargo has been receiving high volumes of eBookings via the platform.

Digitalisation or digital future is a key pillar of the carrier's strategy as it moves towards more systems that allow for dynamic pricing, automatic quotations, robotic integration and improved reporting. Qatar Airways Cargo has introduced a number of digitalisation initiatives like Robotic Process Automation for shipment tracking, Salesforce (Service Cloud), IATA's One Record Pilot project with Agility and Champ, and the roll out of WebCargo even during the challenging times of the pandemic, the release added.

## Hactl targets more aero engines

HONG Kong's largest independent handler, Hong Kong Air Cargo Terminals Ltd (Hactl), is making a bid to increase Hong Kong's involvement in the movement of aero engines through the establishment of a new Aero Engine Handling Centre (AEHC).

Hong Kong is one of only

two locations in Asia which have certified repair, modification and overhaul facilities for Rolls-Royce Trent engines, used in the Airbus A330, A340, A350 and A380, as well as the Boeing 777 and 787 Dreamliner.

Hactl believes that, with enhanced facilities and streamlined procedures, it can help to attract more aero engine traffic to and through Hong Kong. Aero engine handling is already big business for Hactl: it currently handles an average of two units per day. The new facility complements Hactl's existing ability to process aircraft engines, which often weigh over 8 tonnes and are frequently valued at over \$20 million.

Hactl has installed an additional, dedicated out-

size weigh-scale to facilitate double-checking of shipment weights. Meanwhile, enhanced aero engine handling procedures have been drawn up, including the imposition of a 5 kph towing speed limit. All engine ground movements will now take place in convoy with pilot cars front and back. A new, fast-track route has been introduced to reduce

towing distances, clearly marked with height restrictions to prevent collision with overhead obstacles. Only the most experienced of Hactl's tractor drivers will be entrusted with the towing of aero engines.

Hactl's proven ability to handle freighters of all kinds gives it a strong advantage in dealing with this specialised commodity, said a release.

## Cochin airport wins ACI's Roll of Excellence for quality service

FOR consistently delivering excellent services, Cochin International Airport Ltd (CIAL) has won Airport Council International (ACI) Director General's Roll of Excellence honour in Airport Service Quality. ACI World's Director-General, Mr Luis Felipe de Oliveira, said in a communiqué that Cochin International Airport has consistently delivered excellence in customer service by winning multiple ASQ awards over five years and is **one of only six airports worldwide that will receive the recognition this year**. The award will be presented during the ACI Customer Experience Global Summit slated to be held on September 9, 2021 in Montreal, Canada, said a report.

## CMA CGM AIR CARGO leveraging synergies between maritime transport & logistics

CMA CGM AIR CARGO completes the Group's service offering by leveraging synergies between maritime transport and logistics.

In order to offer its customers a comprehensive range of transport solutions, the CMA

CGM Group has launched a dedicated airfreight division called CMA CGM AIR CARGO. The division, which counts four Airbus A330-200F cargo aircraft, each with a carrying capacity of 60 tonnes and a flight range of

nearly 7,500 km, began operations on March 13, 2021 with the first flight between Liège and Chicago, followed by the opening of routes to New York and Atlanta.

With the aim of meeting market demand for fast pick-up and reduced transit times, the Group is expanding the coverage of its airfreight division to new regions with the addition of three new destinations by this summer: Dubai, Beirut and Istanbul, said a release.

## SpiceXpress, Delhivery ink MoU to build drone delivery capability

TO build drone delivery capability in the country, air cargo carrier SpiceXpress and Delhivery have signed a Memorandum of Understanding (MoU).

**Drone delivery is seen as the future of logistics** and both **SpiceXpress** companies have joined hands to experiment with drone technology to provide state-of-the-art services and make it more popular in the coming years. The technology will be tested for several commercial applications like emergency services, delivery of goods, critical medical services and environmental monitoring. Delhivery will provide the necessary on-ground support to ensure speedy and reliable first-mile and last-mile logistics, as per a report.

## Gujarat unveils

**From page 3**

**air freight stations, jetties, ports, etc.,** highlighted a release.

The policy is aligned with the draft National Logistics Policy which focuses on driving the country's economic and trade competitiveness through integrated, seamless, efficient, reliable and cost-effective logistics network by leveraging technology, innovation and skill enhancement.

### Timely policy

The global supply chain changed significantly last year because of the pandemic and many companies are shifting their operations to India. Gujarat has seen an increase in investment, especially in the manufacturing sector. The policy's timing is thus fitting. A robust network of logistics will give competitive advantage to the state, which will help attract more investment and support businesses grow.

It is worth mentioning that Gujarat ranked No. 1 in the Logistics Ease Across Different States (LEADS) Index, instituted by the Ministry of Commerce & Industry, both in 2018 and 2019. The index benchmarks logistics performance across the states. Some of the evaluation parameters of the LEADS index 2019 included availability and quality of logistics infrastructure, ease of track and trace, quality of logistics services, timeliness of cargo delivery, state facilitation and coordination, efficiency of regulatory processes, etc.

### Projects underway

Gujarat is a forward looking state and the government understands that logistics is the backbone of its manufacturing sector. As such, many futuristic projects are already underway. For example, nearly 560 km of the Dedicated Freight Corridor (DFC) will pass through Gujarat, along which freight

logistics parks have been planned to enhance rail-based traffic. The expected investment in this project in Gujarat alone is about Rs 7,000 crore. The Ahmedabad Dholera Expressway, which is 110-km long and six-lane, is also under construction. The expressway will connect Dholera Special Investment Region (SIR) and the proposed Dholera International Airport with Ahmedabad. Development of around 11 jetties and various ports have been planned. Around 7 rail connectivity projects have been proposed for providing connectivity to industrial areas, such as to Hazira Port and industries in the Hazira area to DFC. Existing rail lines are also being enhanced. Gauge conversion project is being undertaken on the Katosan-Becharaji-Chanasma-Ranauj line. Other rail line projects to provide first and last mile connectivity to ports such as New Bedi, Rozi, Nargol, etc. have been envisaged by the state government.

Gujarat's logistics policy was prepared after in-depth analysis of cargo movement data, review of draft National Logistics Policy, benchmarking study of policies of other states covering one or more areas of logistics, and detailed discussions with government and private stakeholders to identify objectives and support areas.

### Incentives and support

As such, specific incentives and support mechanisms have been identified under this policy to promote private sector investment and make the logistics network more efficient. For example, capital subsidy to the tune of 25% of the eligible fixed capital investment (EFICI) shall be provided for construction of logistics facilities and development & mechanisation of new jetties, with a cap

of Rs 15 crore. Interest subsidy at 7% for 7 years on eligible loan term will be extended with a cap of Rs 50 lakh per annum. To bring down the capital cost, the government will also reimburse 100% stamp duty.

Such thrust to infrastructure development needs to be complemented by skilled manpower. The policy focuses on skill enhancement which will improve the employability of youth. Up to Rs 15,000 per trainee for more than 120 hours of training will be reimbursed. In case of women trainees, 100% fees will be reimbursed with the intention of increasing their participation in this sector. Other assistance related to quality certification, patent, R&D will also be provided under this policy.

Another salient feature of the policy is its focus on technology and quality enhancement of logistics services. Specific support will be given to private companies to adopt disruptive technologies to increase their efficiency and visibility across the value chain, including improved tracking of cargo. This will improve the quality of services and will benefit the end user immensely. Greater efficiency in the logistics network will also reduce the overall cost for the

end user.

Transport is seen as a key contributor to CO2 emissions. Any policy should thus focus on decarbonising this sector. Gujarat's Integrated Logistics and Logistics Park policy addresses this concern by extending support to R&D and innovation to make this sector sustainable and environment-friendly.

### Masterplan and experts

A statewide logistics masterplan will be developed as part of this policy, which will study the utilisation of the existing infrastructure and accordingly identify strategic locations for new projects across the state. This will be done through rigorous coordination with over 10 government departments and agencies such as Ports & Transport department, Roads & Buildings department, GUJSAIL, G-Ride, GIDC, GMB, etc.

Considering it a game changer, it is learnt that a separate team of experts will be constituted to implement the objectives of this policy and promote its widespread adoption. These experts will also coordinate with private players and trade associations to identify new initiatives that can be undertaken to make Gujarat a leader in the logistics sector, the release added.

## Onion export earnings down

**Exim News Service**

NEW DELHI, June 30

INDIA'S onion export earnings fell by about nine per cent to a value of Rs 2,107 crore in 2020-21 due to a four-month ban on shipments coupled with a decline in demand due to the Covid pandemic. Overall, it pulled down export earnings to a six-year-low during the 2020-21 financial year. From a high of Rs 4,651 crore in 2016-17, onion export earnings have seen a steady decline,

while volumes have also taken a beating. Exporters attribute the government's move to ban onion exports whenever domestic prices rise for the declining trend, the inconsistent policy resulting in diversion by buyers. The Gulf and Bangladesh are major markets for Indian onion. But this season, Pakistani onion reached the Gulf market in big numbers as there was uncertainty about Indian exports, as per a report.

## Global merchandise trade posting strong gains on path to recovery

**Exim News Service**

GENEVA, June 30

GLOBAL merchandise trade continued to bounce back in the first quarter of 2021 from its collapse earlier in the pandemic, but the pace of recovery has diverged strongly across countries and regions. **The volume of merchandise exports and imports in the first quarter rose to new heights in Asia, reverted to pre-pandemic levels in Europe and North America, and lagged in poorer, less industrialised regions such as Africa and the Middle East,** as per a release.

The volume of world merchandise trade grew 2.1% quarter-on-quarter in Q1, which is equivalent to an annual rate of 8.7%. Year-on-year growth picked up to 4.3% in the same period. A bigger increase is expected in the second quarter due to the steep decline in the same quarter a year ago. The current pace of recovery is broadly consistent with the WTO's most recent forecast of March 31, 2021, which predicted global merchandise trade growth of 8% in 2021 and 4% in 2022. Inequitable access to Covid-19 vaccines continues to pose the greatest threat to the economic outlook since a failure to protect all people regardless of income leaves populations vulnerable to further waves of infection. The next forecast update will be released in October.

Most regions have seen merchandise exports and imports recover to varying degrees since trade bottomed out in the second quarter of last year. The major exception is the Commonwealth of Independent

States (CIS) including certain former and associate members, exports of which have continued to decline. **In the first quarter of 2021, merchandise export volumes were up in Asia (+21.0% year-on-year) and Europe (+1.9%). They were down slightly in South and Central America (-0.1%) and North America (-2.2%), and down more substantially in Africa (-4.6%), the Middle East (-8.4%) and the CIS (-13.9%).**

By comparison, merchandise import volumes were up year-on-year in all regions except **Africa (-0.9%) and the Middle East (-2.7%).** Overall, it appears that the trade recovery to date has been strongest in Asia and weakest in regions that export natural resources disproportionately.

### Merchandise trade values

Merchandise trade in nominal US dollar terms also rebounded strongly in the first quarter, up 14% year-on-year, due to a combination of increased quantities and higher prices. The sharp decline and subsequent rebound since the start of 2020 mostly reflects trends in manufactured goods trade, while other product categories made smaller contributions. Prices of primary commodities fell during the first wave of the pandemic but have since risen steadily, contributing to the upswings in fuels, mining products and agricultural products trade. In May 2021, prices were up 194% year-on-year for fuels, 54% for metals, 45% for food and 26% for agricultural raw materials, according to IMF primary commodity price statistics.

WTO estimates for the first quarter of 2021 show strong year-on-year growth in all main product categories of merchandise trade. Manufactured goods trade was up 16% in the first quarter after having fallen 18% in the second quarter of 2020 at the height of the pandemic. Trade in agricultural products was up 11% in the latest quarter while shipments of fuels and mining products rose 9%.

Sub-sectors of manufactured goods showed positive year-on-year export growth in the first quarter. Computers, telecommunications equipment and integrated circuits all recorded robust year-on-year trade growth of between 25% and 28% in the latest quarter. In contrast, personal items such as footwear, handbags and clothing saw more modest increases of between 4% and 11%. Growth in exports of pharmaceuticals moderated to 8% in the first quarter after having spiked last year.

Despite the strong recovery of merchandise trade values in the first quarter of 2021, exports of many economies remain below their pre-pandemic peaks. Exports of the United States only increased by 1% over this period while those of the European Union rose 10%. Exports of the Russian Federation remained below their level of two years ago (-8%) while those of China were up sharply (+31%). Some countries such as Zambia (+38%) benefitted from improved terms of trade over this period as metals prices rose nearly 50% since 2019, whereas others such as Namibia (-17%) did not, the release said.

## DPT's Dock Safety Committee discusses key issues

Exim News Service

GANDHIDHAM, June 30

THE Dock Safety Committee meeting was conducted recently under the Chairmanship of Mr Nandeesh Shukla, IRTS, Deputy Chairman of Deendayal Port Trust (DPT).

Various safety, health and welfare aspects were reviewed and discussed during the meeting for enhancing the safety and wellbeing of workers employed inside the port.

All HODs, representatives of port user associations, labour unions, PHO, CISF, Fire Dept., etc. were present, said a release.

## DPT celebrating 75th year of Independence

Exim News Service

GANDHIDHAM, June 30

DEENDAYAL

Port Trust (DPT) has been organising various activities in

connection with the 75th year of Independence, "Aazadi ka Amrit Mahotsav", with a variety of programmes to be held from 28/06/2021 to 04/07/2021. Mr C.

Harichandran, Secretary, DPT inaugurated the 'Essay Writing Competition' for employees in the presence of other port officials, informed a release.

## Inaugural vessel of CI1 service calls APM Terminals Pipavav

Exim News Service

PIPAVAV, June 30

APM Terminals Pipavav received the first call of the CI1 (China-India Express) service operated by COSCO/OOCL, last week, it informed in a communiqué.

The vessel *MV OOCL MEMPHIS* of COSCO Shipping Line, with capacity of 8,888 TEUs, reached the port on June 25, 2021. The vessel arrived from Nhava Sheva, Mumbai and was scheduled to sail to Port Klang, Malaysia.

The commodities carried were solar panels, PVC, resin, monofilament & machinery for import, and cotton, soda ash and castor seeds for exports.

The service links Port Pipavav through port calls in the Chinese ports of Shanghai, Ningbo, Shekou, Nansha as well as port of Singapore, Port Klang of Malaysia and Nhava Sheva in Mumbai, India. The CI1 service provides important connectivity to importers and exporters of north-west India to the Far East.

"The new service is a testimony to our ocean and land infrastructure such as the terminals rail connectivity to northern markets and the imminent arrival of the Dedicated freight Corridor, and services that we offer to our customers," the communiqué emphasised.

## Governments urged to prioritise seafarers for vaccinations

Exim News Service

LONDON, June 30

THE International Chamber of Shipping (ICS), along with members and partners, has called for governments to prioritise seafarers for vaccinations **given the growing crew change crisis**, as per a release.

**Mr Esben Poulsson, Chairman of the Board at ICS**, commented on the urgent need for

governments to live up to their responsibilities: "In my 50 years in the maritime industry, the crew change crisis has been unprecedented in the devastating impact it has had on seafarers around the world," he said, following the conclusion of ICS's quarterly board meeting.

"We cannot continue to turn a blind eye to the plight of hundreds of thousands of seafarers. All nations have benefited from their

sacrifice throughout the pandemic. Those same nations have a duty to prioritise seafarers for vaccinations and keep their word to allow crew changes.

**"We will be feeling the ripple effects of this crisis for years to come, but today, governments have a chance to take meaningful action to protect both seafarers and global trade. They must seize it."**

# Port authorities sign declaration on disruption, digitalisation & decarbonisation

Exim News Service

SINGAPORE, June 30

19 port authorities from Africa, Asia, Europe, Middle East and the US signed a declaration on their collective response to disruption, digitalisation and decarbonisation at the 6th Port Authorities Roundtable (PAR) held virtually on June 22 and 23, 2021. It was hosted by Antwerp Port Authority, said a release.

With this year's PAR theme being “Ports as Levers for Change”, participants discussed issues of disruption, digitalisation and decarbonisation facing the maritime industry, and how port authorities should remain agile, adaptable and innovative in response to the challenges. The Maritime and Port Authority of Singapore (MPA) called on PAR members to strengthen collaboration on safe crew change, cyber resilience and response, as well as decarbonisation of the maritime sector.

The declaration recognised work by the Singapore Shipping Tripartite Alliance Resilience (SG-STAR) Fund, the first global tripartite initiative established in 2020 on safe crew changes, through the CrewSafe audit programme to bring a higher level of confidence and quality control checks into crew change processes. The declaration also reflected PAR members' agreement

to consider joining the Port Authorities CIO Cybersecurity Network (PACC-Net), established by MPA, to foster collaboration on maritime cyber security as a global network to facilitate early sharing of cyber threat information and enable timely responses to such threats. Port authorities also agreed to consider collaborating with MPA and like-minded stakeholders on maritime decarbonisation solutions through the maritime decarbonisation centre to be set up in Singapore, as well as overseas decarbonisation centres.

MPA's Chief Executive Ms Quah Ley Hoon said, “The Co-

vid-19 pandemic has accelerated the pace of digitalisation and ports have adapted to quickly harness technology for contactless operations. The plight of seafarers amidst tightened border restrictions also has implications on global trade and their health and safety. The PAR is an important platform for port authorities to come together to leverage each other's experience and expertise to tackle these challenges. **Today's declaration is an important step forward to push forth with digitalisation and decarbonisation solutions in the face of disruption.**”

MPA first initiated PAR in 2015 to facilitate the exchange of ideas and to share best practices amongst leading ports, the release added.

### List of PAR members who signed the declaration

- ★ Abu Dhabi Ports
- ★ Antwerp Port Authority
- ★ Associated British Ports
- ★ Busan Port Authority
- ★ Guangzhou Port Authority

## Minister inaugurates loading operation on maiden voyage of coastal shipping service from Cochin Port to Beypore & Azhikkal ports

Exim News Service  
NEW DELHI/KOCHI, June 30

THE Ministry of Ports, Shipping and Waterways has accorded high priority to **building greater synergies between the Major Ports and non-major ports in order to promote coastal trade and provide sustainable, cost-effective and efficient intermodal and multimodal customer solutions.** By doing so, the Ministry aims to provide seaborne connectivity to trade and industries in the hinterland, reduce congestion on the road and rail, besides bringing down logistics cost.

As a step in this direction, the Union Minister of State (Independent Charge) for the Ministry of Ports, Shipping and

Waterways, Mr Mansukh Mandaviya, on Tuesday inaugurated the loading operation on the maiden voyage of the **coastal shipping service "Green Freight Corridor-2" from Cochin Port to Beypore and Azhikkal ports.**

**Green Freight Corridor service is operated by Round The Coast Pvt. Ltd, Mumbai, a JM Baxi Group company. This service will connect Kochi-Beypore-Azhikkal, with Kollam port to be added later. JM Baxi is the general agent for the service, as per a Ministry release.**

**The vessel will call at Cochin Port twice a week and will feeder ex-im and coastal boxes to Beypore and Azhikkal.**

**The commodities that**

**would be shipped include rice, wheat, salt, construction material, cement, etc. unloaded at Cochin from Gujarat. On the return leg, the operators are targeting to move ex-im cargo such as plywood, footwear, textiles, coffee, etc. Imported cashew containers would also be moved from Cochin to Kollam at a later stage.**

In order to promote coastal shipping of containers, Cochin Port is offering 50% rebate in vessel related charges for River Sea vessels. Similarly, the Government of Kerala has offered an operational incentive @10% above the road transportation cost, as per the NATPC study report, for coastal

shipping in the minor ports of the state for a period of one year from January 23, 2021. These hand-holding measures would help sustain the service during the initial period and encourage introduction of more services of this kind on regular basis, the release said.

The service is expected to bring about a marked modal shift in the transportation of containers, ease the congestion on the road and reduce carbon footprint. This also augurs well to connect the hinterlands of northern Kerala, particularly the ex-im trade in Calicut and Kannur region, who will gain direct access to Vallarpadam ICTT by sea, saving cost and transit time, the release added.
